Delivery calculator, where price depends on the cart value, the number of items in the cart, the time of the order, and the delivery distance.

Technologies: JS, TS, ESLint, SASS, Webpack, Ract, GIT, react testing library, JEST

GitHub link: <https://github.com/Weranika/delivery-calculator>

deploy: https://weranika.github.io/delivery-calculator/delivery_calculator/

Project management system

Project management system is an application that helps a team or group of developers achieve their goals (the analog of Trello / Jira). SPA was created in a team of 3 people. my role:

- Team leader, menegment in group;
- General application design;
- Creating navigation and configuring routing;
- Layout, adaptive and UI of the APP;
- Language switching;
- Creation, delete, display and edit tasks;
- deploy App;

Technologies: JS, TS, REST, ESLint, Prettier, SASS, Webpack, Ract/Redux, GIT, Material-UI, jest, Trello

GitHub link: <https://github.com/Weranika/project-management-app>

deploy: <https://weranika.github.io/project-management-app/project-management-app/#/>

RS Lang

- RS LANG APP created by a team of three people, with access to English basic words vocabulary , in total 3600 words in 6 difficulty categories, including two games to make words learning funny and ability to track your progress;
- my role:
 - defining a single application design;
 - creating navigation and configuring routing for SPA;
 - layout, adaptive and UI of the main page and the list of words;
 - creating a word card;
 - an audio component of an electronic textbook, audio in an Audio call and game statistics;
 - partial design of games and textbooks, partial logic of games.
- using JS, TS, REST, ESLint, SASS, Webpack, Ract/Redux, GIT, Material-UI, Trello, Miro

GitHub link: <https://github.com/Weranika/rs-lang>

deploy: <https://1lisaw.github.io/rslang/>

Online-store

website -defining design, functionality and creating a store using JS, TS, ESLint, SASS, Webpack, Ract/Redux (Hooks)

GitHub link: <https://github.com/Weranika/online-store/tree/online-store>

deploy: <https://weranika.github.io/online-store/online-store/>

Virtual Keyboard

JS generated on-screen keyboard

GitHub link: <https://github.com/Weranika/Virtual-keybord>

deploy: <https://weranika.github.io/Virtual-keybord/>

Shelter

website - from template (Figma) to HTML, CSS, JS + responsive

GitHub link: <https://github.com/Weranika/shelter>

deploy: <https://weranika.github.io/shelter/shelter/pages/main/index.html>

CSS Mem Slider

CSS only Slider, no JS

GitHub link: <https://github.com/Weranika/cssMemSlider>

deploy: <https://weranika.github.io/cssMemSlider/cssMemSlider/src/index.html>

in 2020

Fancy weather

a weather app with weather forecast for 3 days and geolocation data

Using true JS, CSS, Bootstrap-grid

GitHub link: <https://github.com/Weranika/fancy-weather>

deploy: <https://weranika.github.io/fancy-weather/fancy-weather/>

Chat APP

a UI for a chat, using JS, React, Redux, CSS

GitHub link: <https://github.com/Weranika/chat-app>

link: <http://chatapp-3.herokuapp.com/> (unfortunately the server is already disabled)

Neutron mail (layout)

Implemented layout per-pixel comparison via Pixel Perfect extension

GitHub link: <https://github.com/Weranika/neutron-mail>

deploy: https://weranika.github.io/neutron-mail/Neutron_mail/
